RAG Training Knowledge Base

Section 1: Company Information (Q1–Q10)

Q1. What is the company name?

A: The company name is Cyfuture India Private Limited, commonly known as Cyfuture. The cloud division operates under the brand name Cyfuture Cloud at cyfuture.cloud.

Q2. When was the company founded?

A: Cyfuture was founded in the year 2001. The company has over two decades of experience in the IT, cloud, and BPO industry, making it one of India's most established technology service providers.

Q3. Who is the founder of the company?

A: Cyfuture was founded by Anuj Bairathi, who continues to serve as the Founder and Chief Executive Officer (CEO). He is based in Noida, Uttar Pradesh, India, and has been responsible for transforming Cyfuture from a single-room startup into a global enterprise.

Q4. What does the company do?

A: Cyfuture is a technology company that provides end-to-end IT solutions including cloud hosting, data center services, BPO (Business Process Outsourcing), software development, AI/ML solutions, digital marketing, IoT, big data analytics, cybersecurity, and digital transformation services. It serves businesses across e-commerce, banking, government, education, and healthcare sectors.

Q5. What are the company's main products?

A: Cyfuture's main products and services include: Cyfuture Cloud (IaaS, PaaS, SaaS), Cyfuture Lite Cloud (instant cloud servers), Tier III Data Centers, Dedicated and Baremetal Servers, GPU Cloud for AI/ML, Managed Databases, Kubernetes Service, CDN, Load Balancer, DDoS Protection (JDoSS), Object and Block Storage, and BPO/Tech Support services.

Q6. Where is the company headquarters located?

A: Cyfuture's headquarters is located at Plot No. 197-198, Noida Special Economic Zone (NSEZ), Phase II, Noida - 201305, Uttar Pradesh, India. The company also has a second major office at Plot No. 126, NSEZ Phase II, Noida.

Q7. What is the company's mission?

A: Cyfuture's mission is to empower businesses to deliver unmatched performance through inspired thinking, operational excellence, and immersive digital transformation. The company's motto is 'Thinking Future, Moving Ahead'. Cyfuture aims to provide exceptional customer experience and consistently redefine the best through technology innovation.

Q8. What are the company's values?

A: Cyfuture's core values include: Innovation — encouraging adoption of state-of-the-art technology; Transparency — open and honest communication at all levels; Respect — treating all employees and clients with professionalism and dignity; Customer-centricity — keeping client needs at the center of every decision; Excellence — consistently delivering high-quality services; Empowerment — believing every individual has leadership potential.

Q9. How many employees work in the company?

A: Cyfuture employs approximately 3,500+ professionals as of 2025, referred to internally as 'Cyfuturians'. The company's workforce grew by approximately 5% between 2024 and 2025. Employees are spread across Cyfuture's 25+ global locations in India, USA, UK, and Australia.

Q10. Who is the current CEO?

A: The current CEO of Cyfuture is Anuj Bairathi, who is also the Founder. He has been leading the company since its inception in 2001. Other key leaders include Shilpi Agarwal (Board Member), Ravish Sharma (Independent Board Member), Md Salim (Business Development Head), and Rana Roy (Senior Leader for Cloud and Business Architecture).

Section 2: Product Related Questions (Q11–Q25)

Q11. What products does Cyfuture offer?

A: Cyfuture offers: (1) Cloud Computing — Virtual Machines, Baremetal, GPU Cloud, Serverless, Lite Cloud; (2) Storage — Object Storage, Block Storage, NFS, Archival; (3) Databases — MySQL, PostgreSQL, MongoDB, MS SQL, Redis, MariaDB; (4) Networking — CDN, Load Balancer, VPN, Firewall, DDoS Protection; (5) DevOps — Kubernetes, Docker, CI/CD tools; (6) AI/ML — GPU instances, ML platform; (7) Data Center — Hosting, Colocation, Disaster Recovery; (8) BPO — Technical Support, Managed Services.

Q12. Explain Cyfuture Cloud (Lite Cloud).

A: Cyfuture Lite Cloud is a fast, affordable cloud platform that provisions servers in under 30 seconds. It offers NVMe SSD storage for high speed, unlimited data transfer, real-time billing so you pay only for what you use, easy scalability, and a simple management portal. It is ideal for startups, developers, and small to medium businesses who need quick cloud deployment without complex setup.

Q13. What are the features of Cyfuture Cloud?

A: Key features of Cyfuture Cloud include: 99.99% uptime SLA, VMware Cloud Verified infrastructure, NVMe SSD storage, pay-as-you-go billing, auto-scaling, Kubernetes support, managed databases, CDN with global edge nodes, DDoS protection (JDoSS), VPC networking, firewall and security groups, real-time monitoring, 24/7 support, MeitY-empanelled data centers, PCI-DSS and ISO 27701 compliance, and GPU cloud instances for AI/ML workloads.

Q14. What are the benefits of using Cyfuture Cloud?

A: Benefits of Cyfuture Cloud include: Data sovereignty — all data stored in India; MeitY empanelment for government clients; VMware compatibility for easy enterprise migration; No upfront cost with pay-as-you-go pricing; 99.99% uptime guarantee; Local Indian support team available 24/7; PCI-DSS compliance for payment applications; Up to 50% CDN cost savings; Scalable from startup to enterprise; GPU cloud for AI/ML without buying expensive hardware.

Q15. How does Cyfuture Cloud work?

A: Cyfuture Cloud works by virtualizing physical hardware in Cyfuture's Tier III data centers using VMware vSphere and KVM hypervisors. Clients provision resources (VMs, storage, databases) through the Cloud Management Portal (CMP) or API. Resources are allocated within seconds to minutes. Clients pay only for consumed resources, monitored in real-time. Data is stored in encrypted form across redundant storage arrays, and networking is handled via software-defined networking (VMware NSX).

Q16. What is the pricing of Cyfuture Cloud?

A: Cyfuture Cloud uses pay-as-you-go pricing. Virtual machines start from entry-level configurations (1 vCPU, 1 GB RAM) for small workloads up to enterprise configurations (16+ vCPU, 32+ GB RAM). Storage is charged per GB per month. Databases are priced by instance size and storage. Inbound data transfer is free; outbound is charged above a free threshold. CDN is priced per GB delivered. Reserved instances offer 20-40% savings over on-demand pricing. Contact sales at +91-8800766220 for exact quotes.

Q17. Is there a free trial available for Cyfuture Cloud?

A: Yes, Cyfuture offers free trial credits for new customers to test cloud services before committing. New users can sign up at cyfuture.cloud to access trial offerings. The free tier allows testing of basic cloud features without a credit card. Contact the sales team at sales@cyfuture.com or +91-8800766220 to learn about current free trial promotions.

Q18. What are the system requirements for Cyfuture Cloud?

A: To use Cyfuture Cloud, you need: A modern web browser (Chrome, Firefox, Edge) to access the Cloud Management Portal; An internet connection; A valid email address for account creation; A payment method (credit/debit card, net banking, or bank transfer) for billing; For API access, a programming environment supporting REST API calls (Python, Java, Node.js, curl etc.). No special hardware is required as everything runs in Cyfuture's data centers.

Q19. How can I purchase Cyfuture Cloud services?

A: You can purchase Cyfuture Cloud services by: (1) Signing up online at cyfuture.cloud; (2) Calling the sales team at +91-8800766220; (3) Emailing sales@cyfuture.com; (4) Visiting the Noida headquarters for enterprise deals; (5) Through Government e-Marketplace (GEM) portal for government clients. After signing up, you can instantly provision services through the Cloud Management Portal.

Q20. How do I install or set up Cyfuture Cloud?

A: Setting up Cyfuture Cloud: Step 1 — Sign up at cyfuture.cloud and verify your email. Step 2 — Add a payment method and complete KYC. Step 3 — Log into the Cloud Management Portal (CMP). Step 4 — Click 'Create Instance' under Compute. Step 5 — Choose OS (Ubuntu, CentOS, Windows Server), instance size, storage, and network settings. Step 6 — Add your SSH key or set a password. Step 7 — Click Launch — your server is ready in under 30 seconds for Lite Cloud.

Q21. Is Cyfuture Cloud available worldwide?

A: Cyfuture Cloud's data centers are currently located in India (Noida x2, Jaipur, Raipur, Chennai). The service is available to clients globally — businesses in India, USA, UK, Australia, and other countries can use Cyfuture Cloud. However, data physically resides in India, which is a requirement for Indian government clients under data localization laws. CDN edge nodes provide global content delivery performance.

Q22. What are the limitations of Cyfuture Cloud?

A: Some limitations to be aware of: Data centers are currently India-based only (no international data center locations yet); Some niche cloud services available on AWS/Azure may not be available; Pricing information is not fully transparent online — quotes needed for enterprise plans; Free tier is limited compared to hyperscalers like AWS; Some advanced AI/ML managed services are still developing compared to Google Cloud or AWS.

Q23. How is Cyfuture Cloud different from competitors like AWS and Azure?

A: Cyfuture Cloud differs from AWS/Azure in: Data sovereignty — data stays in India; MeitY empanelment for Indian government compliance; Local 24/7 Indian support team; Lower cost for Indian businesses vs. dollar-denominated hyperscaler pricing; VMware Cloud Verified for easy enterprise migration; Personalized enterprise support; No currency exchange risk for Indian businesses. AWS/Azure have more global regions and a larger managed service catalog, but Cyfuture excels for India-specific compliance and cost.

Q24. What updates or new services were released recently?

A: Recent Cyfuture developments include: Launch of Cyfuture Cloud Lite for instant server provisioning; VMware Cloud Verified certification achieved; New data center expansion in Chennai (Tambaram); GPU Cloud instances added for AI/ML workloads; JDoSS DDoS protection service enhanced; ISO 27701 Privacy Information Management certification obtained; Enterprise Cloud Computing Platform of the Year 2024 award won at IDEA Awards by Entrepreneur India.

Q25. What problems does Cyfuture Cloud solve?

A: Cyfuture Cloud solves: High upfront IT infrastructure costs — replaced with pay-as-you-go; Data sovereignty concerns for Indian businesses and government — all data in India; Scalability issues — resources scale up/down in minutes; Compliance complexity — PCI-DSS, ISO, MeitY compliance built-in; Disaster recovery gaps — multi-location backup and DR services; VMware migration challenges — VMware Cloud Verified for seamless migration; 24/7 availability requirements — 99.99% uptime SLA.

Section 3: Customer Support Questions (Q26–Q40)

Q26. How do I create a Cyfuture Cloud account?

A: To create a Cyfuture Cloud account: Visit cyfuture.cloud and click 'Sign Up' or 'Get Started'. Enter your name, email address, phone number, and company name. Verify your email by clicking the link sent to your inbox. Complete KYC verification (for Indian customers — Aadhaar/PAN details). Add a payment method (credit card, debit card, or net banking). You are now ready to log into the Cloud Management Portal and provision services.

Q27. I forgot my password. What should I do?

A: If you forgot your Cyfuture Cloud password: Go to cyfuture.cloud and click 'Login'. Click on 'Forgot Password' below the login form. Enter your registered email address. You will receive a password reset link in your email within a few minutes. Click the link and set a new strong password (minimum 12 characters with uppercase, lowercase, numbers, and symbols). If you do not receive the email, check your spam folder or contact support at support@cyfuture.cloud.

Q28. How can I reset my Cyfuture account password?

A: Password reset steps: Log into the Cloud Management Portal (CMP). Go to 'Account Settings' in the top-right menu. Click on 'Security' or 'Change Password'. Enter your current password, then your new password twice. Click 'Save Changes'. Your password is now updated. For security, Cyfuture recommends changing passwords every 90 days and enabling Multi-Factor Authentication (MFA) for additional protection.

Q29. How do I update my profile on Cyfuture Cloud?

A: To update your profile: Log into the CMP portal at cyfuture.cloud. Click on your account name or avatar in the top-right corner. Select 'Profile Settings' or 'Account Settings'. Update your name, phone number, company name, billing address, or notification preferences. Click 'Save' to apply changes. For email address changes, an additional verification step is required. For billing details, go to the 'Billing' section under account settings.

Q30. How can I contact Cyfuture customer support?

A: Cyfuture customer support can be reached through: Phone: +91-8800766220 (Sales) or +91-120-6277700 (Main). Email: sales@cyfuture.com (Sales) or grievance@cyfuture.com (Complaints). Support Ticket: Log into the CMP portal and raise a ticket under 'Support'. Live Chat: Available on cyfuture.cloud website during business hours. In-Person: Visit the Noida HQ at Plot No. 197-198, NSEZ Phase II, Noida.

Q31. What are Cyfuture customer support working hours?

A: Cyfuture provides 24/7 support for enterprise and managed services clients. Standard support hours are 9:00 AM to 9:00 PM IST for general inquiries. Critical infrastructure issues are handled round the clock by the NOC (Network Operations Center) team. Response times vary by support plan: Enterprise — 15 minutes; Professional — 1 hour; Standard — 4 hours; Basic — next business day.

Q32. How long does Cyfuture support take to respond?

A: Response times by support tier: Basic plan — next business day; Standard plan — within 4 hours; Professional plan — within 1 hour; Enterprise plan — within 15 minutes with dedicated

account manager. For P1 (Critical) issues affecting production infrastructure, 24/7 response is provided regardless of plan. Managed services clients get proactive monitoring with immediate response to alerts.

Q33. How can I submit a complaint to Cyfuture?

A: To submit a complaint: Email grievance@cyfuture.com with your account details and issue description. Contact Grievance Officer Hemendra Bhardwaj (AVP) at the same email. Alternatively, raise a complaint ticket through the CMP portal under 'Support > Raise Complaint'. For billing disputes, contact billing@cyfuture.com. Cyfuture is committed to resolving complaints within defined SLA timelines based on severity.

Q34. How can I track my support request at Cyfuture?

A: To track your support request: Log into the CMP portal at cyfuture.cloud. Navigate to 'Support' or 'Help Desk' section. View your open, in-progress, and resolved tickets with timestamps and technician notes. You will also receive email notifications for every status update on your ticket. For phone-based requests, ask the support agent for a ticket reference number to track progress.

Q35. Why is my Cyfuture account not working?

A: Common reasons your account may not work: Incorrect email or password — use the 'Forgot Password' option; Account suspended due to unpaid invoices — check billing dashboard and clear dues; Account locked after multiple failed login attempts — wait 30 minutes or contact support; Browser cache issue — clear cache and cookies and try again; Two-factor authentication issue — contact support to reset MFA. If the problem persists, email support@cyfuture.cloud with your account ID.

Q36. Why am I unable to login to Cyfuture Cloud?

A: If you cannot log in: Check that you are using the correct email and password; Ensure Caps Lock is not on; Try the 'Forgot Password' option to reset; Clear your browser cache and cookies; Try a different browser (Chrome recommended); Check if your account email is verified; Ensure your account is not suspended due to billing issues; Disable browser extensions that might interfere; Contact support at +91-8800766220 if the issue persists.

Q37. How do I delete my Cyfuture Cloud account?

A: To delete your Cyfuture account: Ensure all running instances, databases, and storage are terminated to avoid charges. Download any data you wish to keep. Raise a 'Account Closure Request' ticket through the CMP portal or email support@cyfuture.cloud. The team will verify your identity and process the closure. Note: Account deletion is irreversible and all data will be permanently deleted after the closure period. Ensure no active contracts or commitments are pending.

Q38. How do I change my email address on Cyfuture?

A: To change your registered email: Log into the CMP portal. Go to Account Settings > Profile. Click 'Change Email'. Enter your new email address and your current account password. A verification link will be sent to your new email. Click the link to confirm. Your email will be updated after verification. Note: Your new email becomes your login ID. If you face issues, contact support@cyfuture.cloud with your account details and identity proof.

Q39. How do I change my phone number on Cyfuture?

A: To update your phone number: Log into the CMP portal. Go to Account Settings > Profile > Contact Details. Click 'Edit' next to phone number. Enter your new phone number. An OTP (One-Time Password) will be sent to the new number for verification. Enter the OTP to confirm the change. Your phone number is now updated. Phone numbers are used for account security alerts and support callbacks.

Q40. How can I provide feedback to Cyfuture?

A: You can provide feedback to Cyfuture through: Customer satisfaction survey sent after support tickets are resolved; Email to feedback@cyfuture.com; Through your dedicated account manager (enterprise clients); Glassdoor or Google Reviews for general company feedback; LinkedIn or social media — @cyfuture; CMP portal feedback option under 'Help'. Cyfuture values client feedback and uses it to improve services and processes.

Section 4: Company Policies (Q41–Q55)

Q41. What is Cyfuture's privacy policy?

A: Cyfuture is ISO 27701 certified for Privacy Information Management. The company collects only necessary client data, uses it solely for service delivery, does not sell personal data to third parties, stores all data in India-based data centers, implements AES-256 encryption for data at rest and TLS 1.2/1.3 for data in transit, provides clients control over their data, and complies with Indian data protection laws. Full privacy policy is available at cyfuture.com.

Q42. What is Cyfuture's refund policy?

A: For cloud services: Pay-as-you-go services are billed for actual usage — unused prepaid credits may be refunded upon account closure after verification. For annual reserved instances, refunds are subject to the contract terms agreed at purchase. Service credits are provided as compensation when SLA uptime guarantees (99.99%) are not met. Contact billing@cyfuture.com for refund requests with your account ID and invoice details.

Q43. What is Cyfuture's cancellation policy?

A: For Cyfuture Cloud: On-demand/pay-as-you-go services can be cancelled anytime by terminating instances in the CMP portal — billing stops immediately. Reserved instances (annual/3-year contracts) are subject to early termination fees as defined in the contract. Managed services have a notice period (typically 30-90 days) for cancellation as per the service agreement. Contact your account manager or sales@cyfuture.com for cancellation of enterprise contracts.

Q44. What are Cyfuture's terms and conditions?

A: Cyfuture's terms and conditions govern the use of all cloud and IT services. Key terms include: Services are provided as-is with defined SLAs; Clients are responsible for data backed up on their instances; Cyfuture is not liable for data loss beyond defined SLA terms; Acceptable use policy prohibits using services for illegal activities, spam, or attacks; Clients must comply with applicable Indian and international laws; Full terms available at cyfuture.com/terms.

Q45. What is Cyfuture's employee leave policy?

A: Cyfuture's employee leave policy includes: Casual Leave (CL) — 7-8 days per year; Sick Leave (SL) — 7 days per year; Earned/Privileged Leave (EL/PL) — 12-15 days per year (can be carried forward); Public Holidays — 10-12 days per year; Maternity Leave — 26 weeks as per Maternity Benefit Act; Paternity Leave — available per company policy; Bereavement Leave — for immediate family. Leave requests are submitted through the HR portal or directly to the reporting manager.

Q46. How many paid leaves are available at Cyfuture?

A: Cyfuture employees receive approximately 34-37 paid days off per year: 7-8 Casual Leaves, 7 Sick Leaves, 12-15 Earned Leaves, and 10-12 Public Holidays. Earned Leaves can be accumulated and carried forward to the next year. Leave encashment may be available for unused Earned Leaves as per company policy. Total paid leave entitlement may vary slightly by role, level, and department.

Q47. What is Cyfuture's work-from-home (WFH) policy?

A: Cyfuture's WFH policy varies by role and department. For corporate and IT roles, hybrid work (partial WFH) may be available based on project requirements and manager approval. BPO and

data center roles generally require on-site presence due to the nature of work. WFH requests are evaluated on a case-by-case basis. During special circumstances (e.g., health emergencies), full WFH may be permitted. Check with your HR business partner for your specific role's WFH eligibility.

Q48. What is Cyfuture's attendance policy?

A: Cyfuture's attendance policy requires employees to: Maintain minimum attendance as per company standards (typically 90%+); Swipe in and out using the biometric system daily; Notify the reporting manager and HR in advance for planned absences; Provide medical certificate for sick leaves exceeding 2 consecutive days; Late arrivals are noted and habitual late-coming may affect performance appraisal; Attendance data is tracked monthly and forms part of the performance review.

Q49. What is Cyfuture's security policy?

A: Cyfuture's security policy covers: Multi-Factor Authentication (MFA) mandatory for all admin accounts; API key rotation every 90 days; Role-based access control — minimum privilege principle; Data encryption at rest (AES-256) and in transit (TLS 1.3); Regular security audits and penetration testing; Incident response plan for security breaches; Compliance with PCI-DSS, ISO 27001, ISO 27701 standards; Employee security awareness training; Physical security with biometric access at data centers.

Q50. What is Cyfuture's data protection policy?

A: Cyfuture's data protection policy ensures: All client data is stored exclusively in India-based data centers; Data is encrypted at rest using AES-256 and in transit using TLS 1.2/1.3; Access to client data is strictly controlled on need-to-know basis; Regular backups with point-in-time recovery; Data deletion follows DoD 5220.22-M standards for decommissioned hardware; ISO 27701 certification for privacy management; Compliance with Indian IT Act and data protection regulations; Clients can request data export or deletion.

Q51. How does Cyfuture protect customer data?

A: Cyfuture protects customer data through: AES-256 encryption for stored data; TLS 1.3 for data in transit; DDoS protection via JDoSS system; Enterprise-grade firewalls and IDS/IPS; VPC network isolation between clients; Role-based access control; 24/7 NOC monitoring; Physical security at data centers (biometric, CCTV, guards); Regular third-party security audits; PCI-DSS and ISO 27001 compliance; Immutable audit logs; Secure data deletion upon account closure.

Q52. What is Cyfuture's payment policy?

A: Cyfuture's payment policy: Pay-as-you-go for on-demand cloud services billed monthly; Annual billing available with discounts of 20-40% for reserved instances; Accepted payment methods: credit card, debit card, net banking, UPI, bank transfer; GST invoices provided for Indian customers; International payments via wire transfer for global clients; Invoices generated automatically on the 1st of each month; Overdue payments may result in service suspension after grace period; Contact billing@cyfuture.com for payment queries.

Q53. What is Cyfuture's shipping policy?

A: Cyfuture is primarily a digital cloud and IT services company — there is no physical product shipping for cloud services as all services are delivered digitally through the internet. For hardware colocation services, clients are responsible for shipping their own equipment to the data center. Cyfuture provides physical address and logistics coordination guidance for colocation hardware.

Contact the data center team at the Noida HQ for colocation delivery scheduling.

Q54. What is the return policy for Cyfuture services?

A: For Cyfuture Cloud services: Digital cloud services cannot be 'returned' in the traditional sense; Unused prepaid credits are subject to refund per the refund policy; If a service does not meet the agreed SLA, service credits are issued as compensation; For hardware-related services (colocation), equipment can be retrieved by the client with advance notice; Enterprise software licenses and managed services follow contract-specific return/exit terms. Contact your account manager for service-specific return processes.

Q55. What are Cyfuture's warranty terms?

A: Cyfuture provides the following service guarantees: 99.99% uptime SLA for cloud infrastructure; Service credits issued if uptime SLA is breached; Hardware in data centers maintained and replaced by Cyfuture (for hosted services); Managed service SLAs for response and resolution times; No warranty on client-owned hardware in colocation; Software bugs in Cyfuture proprietary platforms are fixed per the support SLA. Enterprise clients can negotiate extended warranty and SLA terms in their service agreements.

Section 5: HR Related Questions (Q56–Q70)

Q56. How can I apply for a job at Cyfuture?

A: To apply for a job at Cyfuture: Visit cyfuture.com/current-opportunities.html for the latest openings. Search on Naukri.com, LinkedIn, or Indeed for 'Cyfuture'. Submit your updated resume and cover letter through the online application form. You can also email your resume to hr@cyfuture.com with the job title in the subject line. For campus recruitment, Cyfuture visits engineering and management colleges annually.

Q57. What job openings are currently available at Cyfuture?

A: Cyfuture typically has openings in: Cloud Engineering (DevOps, Kubernetes, AWS/Azure), Software Development (Python, Java, React, Node.js), AI/ML Engineering, Data Science, Technical Support (BPO), Network Engineering, Digital Marketing (SEO, SEM, Social Media), Business Development, QA Testing, Data Center Operations, HR, and Finance. Check cyfuture.com/current-opportunities.html or Naukri.com for current live openings.

Q58. What qualifications are required to work at Cyfuture?

A: Qualifications vary by role: For IT/Cloud roles — B.Tech/B.E. in Computer Science, IT, or Electronics; For BPO/Support — Graduation in any stream with good English communication; For AI/ML roles — B.Tech + Masters in CS/Data Science preferred; For Digital Marketing — BBA/MBA in Marketing or relevant certifications; For Data Center — Diploma/B.Tech in Electronics or IT; For Sales — MBA or graduation with strong communication skills. Freshers are welcome for entry-level roles.

Q59. What is Cyfuture's hiring process?

A: Cyfuture's hiring process: Step 1 — Online application submission; Step 2 — Resume screening by HR; Step 3 — HR telephonic screening (15-30 mins, communication and fitment check); Step 4 — Technical round (coding test or technical interview for IT roles); Step 5 — Managerial round (for senior positions); Step 6 — HR final round (salary discussion, joining date); Step 7 — Offer letter issued within 3-7 days; Step 8 — Document verification and onboarding. Total process typically takes 1-2 weeks.

Q60. How many interview rounds are there at Cyfuture?

A: Cyfuture typically has 1-2 interview rounds for most positions. For BPO and support roles, the process is often completed in a single day with 1 round. For IT and technical roles (cloud, software development, AI/ML), expect 2 rounds: a technical assessment/interview plus an HR round. For senior and leadership positions (Manager and above), there may be 3 rounds including a leadership/cultural fit round. The interview difficulty is rated 2.8/5 — moderate level.

Q61. How long does Cyfuture's recruitment process take?

A: The typical Cyfuture recruitment timeline: Resume screening — 2-3 business days; Interview scheduling — within 1 week of application; Interview rounds — 1-3 days; Offer letter issuance — 3-7 days after final round; Document verification — 1-2 weeks; Joining date — typically 2-4 weeks after offer acceptance. Total end-to-end: 2-4 weeks for most roles. Urgent positions may be filled faster. Campus recruitment follows the college placement season calendar.

Q62. What documents are required for joining Cyfuture?

A: Documents required for joining Cyfuture: 10th and 12th marksheets and certificates; Graduation/Post-graduation degree and marksheets; Previous employment offer letters and relieving letters (for experienced candidates); Last 3 months salary slips (for experienced); Aadhaar card (original + 2 photocopies); PAN card (original + 2 photocopies); 4-6 passport size photographs; Bank account details (cancelled cheque or passbook copy); Address proof; Offer letter printed copy.

Q63. What is the salary structure at Cyfuture?

A: Cyfuture's salary structure includes: Basic Salary (40-50% of CTC); HRA/House Rent Allowance (20-30%); Special Allowance (10-20%); Performance Bonus (5-15% variable); Provident Fund (12% of basic); Medical Insurance; Gratuity (for 5+ years). Approximate annual CTC ranges: Fresher BPO — 1.8-2.5 LPA; Junior Developer — 3-6 LPA; Cloud Engineer (mid) — 7-14 LPA; Manager — 15-25 LPA; Senior Manager/AVP — 25-40 LPA; Director+ — 40 LPA and above.

Q64. What benefits does Cyfuture provide to employees?

A: Cyfuture employee benefits include: Free meals in office cafeteria; Free cab/shuttle facility; Saturday-Sunday fixed off; Medical insurance (group health cover); Provident Fund (PF) contribution; Gratuity for long-term employees; Performance bonuses; Annual salary increment (appraisal); Learning and development programs; Certification support (AWS, Azure, VMware); Great Place to Work Certified culture; Employee engagement activities; Career growth opportunities.

Q65. Does Cyfuture provide insurance to employees?

A: Yes. Cyfuture provides group medical insurance (health insurance) to all eligible employees. The insurance covers hospitalization expenses for the employee and may include coverage for dependents (spouse and children) depending on the plan. The insurance is part of the CTC and is managed by a third-party insurance provider. For details on the specific insurance provider, coverage amount, and claim process, employees should contact the HR department on joining.

Q66. Does Cyfuture offer internships?

A: Yes, Cyfuture offers internship programs for students and fresh graduates. Internship stipends range from INR 8,000 to INR 20,000 per month depending on the role. Technical internships (cloud, software, AI/ML) offer higher stipends. Internship duration is typically 2-6 months. High-performing interns may receive a Pre-Placement Offer (PPO) for full-time employment. Apply through cyfuture.com/careers or contact college placement cells that have Cyfuture as a recruiting partner.

Q67. How can employees request leave at Cyfuture?

A: Employees can request leave by: Submitting a leave request through the HR portal/HRMS system; Sending an email to the reporting manager with CC to HR at least 2-3 days in advance for planned leaves; For sick leave, notifying the manager on the same day via phone/message and submitting the request on return; For emergency leave, calling the manager directly. All leave requests require manager approval. A medical certificate is required for sick leave exceeding 2 consecutive days.

Q68. How can employees view their salary details at Cyfuture?

A: Employees can view salary details through: The HRMS (Human Resource Management System) portal — login with employee ID to view monthly payslips; Salary is credited to the registered bank account on the salary date each month; Form 16 is provided annually for income tax purposes; Salary revision letters are issued after annual appraisal; For discrepancies, employees should

contact the HR payroll team or their HR business partner directly.

Q69. Who should employees contact for HR issues at Cyfuture?

A: For HR-related issues, Cyfuture employees should contact: Their HR Business Partner (HRBP) assigned to their department; Reporting Manager for day-to-day work issues; HR department at hr@cyfuture.com for general HR queries; Grievance Officer Hemendra Bhardwaj (AVP) at grievance@cyfuture.com for formal complaints; For payroll issues — HR Payroll team; For appraisal issues — HR HRBP + Reporting Manager; For harassment or misconduct — confidential complaint to the Internal Complaints Committee (ICC).

Q70. What training programs are available at Cyfuture?

A: Cyfuture offers: New joiner induction program (company, products, tools, policies); Role-specific technical training (cloud, coding, networking, BPO scripts); Cloud certifications support (AWS, Azure, GCP, VMware); Leadership development programs for senior employees; Soft skills training (communication, customer handling, presentation); Compliance training (data security, PCI-DSS awareness); Vendor-led training (Cisco, Red Hat, Microsoft); Online learning platform access for self-paced learning; Domain-specific certifications encouraged and sometimes sponsored.

Section 6: Technical Questions (Q71–Q85)

Q71. How does Cyfuture Cloud software work?

A: Cyfuture Cloud works on a virtualization-based architecture: Physical servers in Tier III data centers run VMware vSphere (ESXi) and KVM hypervisors. Clients access resources through the Cloud Management Portal (CMP) web interface or REST API. The CMP communicates with the orchestration layer to provision VMs, storage, and networking in seconds. Software-defined networking (VMware NSX) handles VPCs, firewalls, and routing. Storage is provided via Ceph and VMware vSAN. Billing is tracked in real-time per resource consumed.

Q72. What technologies does Cyfuture use?

A: Cyfuture's technology stack includes: Hypervisors — VMware vSphere, KVM; Containers — Kubernetes, Docker; Storage — Ceph, VMware vSAN, NVMe SSD; Networking — VMware NSX, Cisco hardware, HAProxy; Databases — MySQL, PostgreSQL, MongoDB, MS SQL, Redis, MariaDB; Monitoring — Prometheus, Grafana, ELK Stack; DevOps — Jenkins, GitLab CI, Terraform, Ansible; Cloud Partners — AWS, Microsoft Azure, Google Cloud, Alibaba Cloud; Security — JDoSS DDoS protection, AES-256, TLS 1.3; Programming — Python, Java, Node.js, React for internal tools.

Q73. What APIs are available from Cyfuture?

A: Cyfuture Cloud provides RESTful APIs for: Compute — list, create, start, stop, delete instances; Storage — manage buckets, upload/download objects, configure storage classes; Databases — provision, scale, backup database instances; Networking — manage VPCs, subnets, load balancers, firewalls; Monitoring — fetch metrics and performance data; Billing — retrieve usage and invoice data; Snapshots — create and restore snapshots. All APIs use JSON format and require API key authentication via Bearer token in request headers.

Q74. How can developers integrate with Cyfuture Cloud?

A: Developers can integrate with Cyfuture Cloud using: REST API with Bearer token authentication; Python SDK for programmatic resource management; Terraform provider for infrastructure-as-code deployments; Ansible playbooks for configuration management; S3-compatible API for object storage (works with existing S3 tools); Kubernetes kubectl for container management; Webhook support for event-driven automation; API documentation available at docs.cyfuture.cloud. Contact the developer support team at dev-support@cyfuture.cloud for integration assistance.

Q75. What authentication methods are supported by Cyfuture?

A: Cyfuture Cloud supports: API Key authentication (Bearer token) for API access; Username/password with Multi-Factor Authentication (MFA) for portal login; SSH key pairs for Linux VM access; RDP with password for Windows VMs; SAML 2.0 and OAuth 2.0 for Single Sign-On (SSO) integration with enterprise identity providers (Active Directory, Okta, Azure AD); IP whitelisting for restricting portal and API access to specific IP ranges; RBAC (Role-Based Access Control) for team member permissions.

Q76. What databases does Cyfuture use and support?

A: Cyfuture supports the following managed database services: MySQL 5.7 and 8.0; PostgreSQL 12, 13, 14, 15; MongoDB 4.4, 5.0, 6.0 (single node, replica set, sharded cluster); Microsoft SQL Server 2016, 2019, 2022; MariaDB 10.5, 10.6, 10.11; Redis Cache 6.x and 7.x (single and cluster

mode). All managed databases include automated daily backups, point-in-time recovery, high availability failover, monitoring, and SSL connections. Custom databases can be installed on VM instances.

Q77. What are Cyfuture Cloud API rate limits?

A: Cyfuture Cloud API rate limits are designed to prevent abuse and ensure fair usage: Standard accounts — 100 API requests per minute; Pro accounts — 500 API requests per minute; Enterprise accounts — custom rate limits per agreement. When the rate limit is exceeded, the API returns HTTP 429 (Too Many Requests). Implement exponential backoff in your code to handle rate limiting gracefully. For higher rate limits, contact the enterprise sales team at sales@cyfuture.com.

Q78. How can I generate an API key on Cyfuture Cloud?

A: To generate an API key: Log into the CMP portal at cyfuture.cloud. Click on your account name in the top-right corner. Go to 'Account Settings' > 'API Keys'. Click 'Generate New API Key'. Give the key a descriptive name (e.g., 'Production App', 'Terraform'). Set an expiry date for the key (recommended: 90 days for security). Copy and securely store the key — it will only be shown once. Use the key in API requests: Authorization: Bearer YOUR_API_KEY.

Q79. How do I troubleshoot errors on Cyfuture Cloud?

A: Troubleshooting steps for Cyfuture Cloud: Check the CMP dashboard for any ongoing service incidents or maintenance notices. Review the error message — HTTP 401 means authentication issue; 403 is permission denied; 404 is resource not found; 500 is server error. Check resource limits — ensure you have not exceeded your quota. Review firewall rules if connectivity is the issue. Check server logs via CMP console access. If the issue persists, raise a support ticket through the CMP portal with error details, timestamps, and affected resource IDs.

Q80. What are common technical issues with Cyfuture Cloud?

A: Common technical issues and solutions: Cannot SSH to VM — check firewall rules allow port 22 from your IP; VM not responding — check instance status in CMP, try restart; High latency — check resource utilization, scale up if CPU/RAM is at capacity; Database connection refused — check security group rules and connection string; Storage full — increase volume size in CMP or delete unused files; Billing seems high — review resource usage report in billing dashboard; API errors — check API key validity and rate limits.

Q81. How do I configure a Cyfuture Cloud server?

A: To configure a Cyfuture Cloud server after launch: Connect via SSH (Linux) or RDP (Windows) using credentials from the CMP portal. Update OS packages: `sudo apt update && sudo apt upgrade` (Ubuntu). Configure firewall rules in CMP to allow required ports. Mount additional block storage volumes if needed. Install required software (web server, database, application). Configure domain DNS to point to the server's public IP. Enable automated backups and monitoring from the CMP portal. Set up SSL certificate for web applications.

Q82. What platforms are supported on Cyfuture Cloud?

A: Cyfuture Cloud supports: Operating Systems — Ubuntu 18.04/20.04/22.04, CentOS 7/8, Debian 10/11, Windows Server 2016/2019/2022, Red Hat Enterprise Linux; Container Platforms — Kubernetes (CKS), Docker; Virtualization — VMware vSphere compatible workloads; Web Servers — Apache, NGINX, IIS; Application Servers — Tomcat, Node.js, Gunicorn; Databases — see database section; Programming Runtimes — Python, Java, Node.js, PHP, Ruby, Go, .NET. Custom

OS images can also be uploaded.

Q83. What programming languages are supported for Cyfuture Cloud API?

A: Cyfuture Cloud REST APIs can be used with any programming language that supports HTTP requests: Python (using requests or boto3 for S3-compatible storage); JavaScript/Node.js (using axios or fetch); Java (using HttpClient or OkHttp); Go (using net/http package); PHP (using cURL or Guzzle); Ruby (using Net::HTTP); C# / .NET (using HttpClient); Bash/Shell (using curl). SDK wrappers are available for Python and are being developed for other languages. Terraform provider is available for infrastructure-as-code.

Q84. Where is Cyfuture's technical documentation?

A: Cyfuture technical documentation is available at: Primary docs portal — docs.cyfuture.cloud; API reference — docs.cyfuture.cloud/api; Getting started guides — docs.cyfuture.cloud/quickstart; Kubernetes guide — docs.cyfuture.cloud/kubernetes; Storage guide — docs.cyfuture.cloud/storage; Main website — cyfuture.cloud with product pages. For enterprise clients, dedicated solution architects provide custom documentation and architecture guides. Contact dev-support@cyfuture.cloud for documentation requests.

Q85. How do I report a bug or technical issue to Cyfuture?

A: To report a bug or technical issue: Log into the CMP portal and go to Support > Raise Ticket. Select issue type as 'Bug' or 'Technical Issue'. Provide: affected resource ID, error message, steps to reproduce, timestamps, screenshots or logs. Assign priority: P1 (production down), P2 (major impact), P3 (minor issue). You will receive a ticket ID for tracking. Alternatively, email techsupport@cyfuture.cloud with the above details. Critical P1 bugs can be escalated by calling +91-8800766220.

Section 7: Sales and Business Questions (Q86–Q95)

Q86. How much does Cyfuture Cloud service cost?

A: Cyfuture Cloud pricing is pay-as-you-go. Entry-level VMs start from affordable rates for 1 vCPU / 1 GB RAM configurations. Storage is charged per GB per month. Databases are priced by instance size. Inbound transfer is free. CDN is charged per GB delivered. Reserved instances offer 20-40% savings for 1-3 year commitments. For exact pricing, visit cyfuture.cloud/pricing or contact sales at +91-8800766220 or sales@cyfuture.com for a customized enterprise quote.

Q87. Does Cyfuture offer enterprise plans?

A: Yes. Cyfuture offers dedicated enterprise plans with: Custom pricing based on volume and committed usage; Dedicated account manager for enterprise clients; Priority 15-minute SLA response times; Custom SLA terms beyond the standard 99.99%; Reserved capacity guarantees; Multi-region deployment options; Custom security configurations; Volume discounts; Quarterly business reviews; Dedicated technical architect support. Contact enterprise-sales@cyfuture.com or call +91-8800766220 to discuss enterprise requirements.

Q88. Does Cyfuture provide discounts?

A: Yes, Cyfuture provides discounts through: Reserved instances — 20-40% off for 1-year or 3-year commitments; Volume discounts for large-scale deployments; Startup discounts for early-stage companies; Educational institution discounts; Government pricing through GEM portal; Promotional credits for new customers; Partner discounts for Cyfuture technology partners; Seasonal promotions. Contact sales@cyfuture.com to discuss discount eligibility for your use case.

Q89. How can I contact Cyfuture sales?

A: Cyfuture sales can be reached via: Phone: +91-8800766220 (primary sales line, Mon-Sat 9 AM - 6 PM IST); Email: sales@cyfuture.com; Website contact form: cyfuture.cloud/contact-us.html; LinkedIn: linkedin.com/company/cyfuture; Visit in person: Plot No. 197-198, NSEZ Phase II, Noida - 201305; For cloud-specific sales: cyfuture.cloud/contact-us. The sales team typically responds within 24 hours on business days.

Q90. Can I schedule a demo of Cyfuture Cloud?

A: Yes! You can schedule a Cyfuture Cloud demo by: Calling +91-8800766220 and requesting a demo; Emailing sales@cyfuture.com with subject 'Demo Request' and your preferred date/time; Filling the contact form at cyfuture.cloud/contact-us; Connecting with a Cyfuture sales representative on LinkedIn. Demo sessions are conducted online (video call) or in-person at the Noida office. The demo covers the CMP portal, service provisioning, monitoring, and billing walkthrough.

Q91. Who are Cyfuture's customers?

A: Cyfuture serves 1,000+ clients including Fortune 500 companies. Notable clients include: PwC, BharatPe, TATA Group, INTEX, Indian Oil Corporation, Punjab National Bank (PNB), IDEMIA, Bharat Petroleum, NTPC, Thomson Digital. Client sectors include e-commerce, banking and finance, government agencies, education, healthcare, IT companies, manufacturing, telecom, and media. The company has served clients in India, USA, UK, and Australia.

Q92. What industries use Cyfuture's products?

A: Cyfuture serves clients across: E-commerce and Retail — scalable hosting for online stores; Banking and Finance — PCI-DSS compliant infrastructure; Government — MeitY-empanelled cloud for government digital services; Education — e-learning platforms and student management systems; Healthcare — EHR, PACS, and telemedicine platforms; IT and Software — dev/test environments, SaaS hosting; Telecom — network management systems; Manufacturing — ERP hosting and IoT platforms; Travel and Hospitality — booking system hosting; Media — content streaming and CDN.

Q93. Why should I choose Cyfuture over other providers?

A: Reasons to choose Cyfuture: Data stays in India — all data in MeitY-empanelled Indian data centers; Government approved — suitable for Indian government projects; VMware compatibility — easy migration of existing VMware workloads; Local Indian support team — 24/7 support in Indian timezone; PCI-DSS and ISO compliance built-in; Competitive pricing in INR — no USD exchange risk; GPU cloud for AI/ML at competitive rates; 99.99% uptime guarantee; 22+ years of proven experience serving Fortune 500 clients.

Q94. What makes Cyfuture's product unique?

A: Cyfuture's unique differentiators: Only one of few Indian cloud providers with MeitY-empanelled data centers at multiple locations; VMware Cloud Verified — rare certification for Indian cloud providers; Indigenous data centers — full data sovereignty in India; Tier III certified facilities ensuring enterprise-grade reliability; Both cloud AND data center services from one vendor; GPU cloud for AI/ML combined with BPO and software development services; Cyfuture Lite Cloud — server ready in under 30 seconds; 22+ years of experience with deep domain expertise.

Q95. What competitors does Cyfuture compare with?

A: Cyfuture competes with: Indian Cloud Providers — NTT Data (India), CtrlS, Netmagic, Tata Communications, Sify Technologies, ESDS; Global Hyperscalers — AWS India, Microsoft Azure India, Google Cloud India (for enterprise cloud); Data Center Peers — Nxtra (Airtel), CtrlS, STT GDC India; BPO Competitors — Infosys BPM, Wipro, HCL Tech BPS. Cyfuture's advantage over global hyperscalers is data sovereignty, MeitY compliance, and local support. Versus Indian peers, VMware Cloud Verified status and multi-location data centers are key differentiators.

Section 8: General AI Assistant Questions (Q96–Q100)

Q96. Can you summarize Cyfuture as a company?

A: Cyfuture India Private Limited is a leading Indian technology company founded in 2001 by Anuj Bairathi. Headquartered in Noida, Uttar Pradesh, it provides cloud hosting, data center services, BPO, software development, AI/ML, digital marketing, and digital transformation solutions. With 3,500+ employees across 25+ global locations, Cyfuture serves 1,000+ clients including Fortune 500 companies across e-commerce, banking, government, and healthcare. Key strengths include MeitY-empanelled Tier III data centers, VMware Cloud Verified cloud platform, PCI-DSS compliance, and 99.99% uptime SLA.

Q97. Explain Cyfuture Cloud in simple language.

A: Cyfuture Cloud is like renting a powerful computer on the internet instead of buying one. Instead of spending lakhs on physical servers, you pay only for what you use — like paying for electricity. You can get a virtual server ready in under 30 seconds, store unlimited data, run databases, and protect your website from attacks. All your data stays in India, which is important for Indian businesses and government. You can scale up during busy periods and scale down when things are quiet, and you only pay for what you use.

Q98. What are the most important points about Cyfuture?

A: Key facts about Cyfuture: (1) Founded 2001 by Anuj Bairathi — 22+ years experience; (2) 3,500+ employees across 25+ global locations; (3) 1,000+ clients including Fortune 500 companies; (4) 4 Tier III MeitY-empanelled data centers in India (Noida x2, Jaipur, Raipur, Chennai); (5) VMware Cloud Verified cloud platform; (6) 99.99% uptime SLA; (7) PCI-DSS and ISO 27701 compliant; (8) Services: Cloud, Data Center, BPO, Software Development, AI/ML, Digital Marketing; (9) Free meals and cabs for employees; (10) Great Place to Work Certified.

Q99. How does Cyfuture Cloud compare to Cyfuture Data Center services?

A: Cyfuture Cloud vs Cyfuture Data Center: Cloud services are virtual — you rent virtualized compute, storage, and networking on shared infrastructure with flexible pay-as-you-go pricing. Data Center services are physical — you can colocate your own hardware in Cyfuture's secure facility, or rent dedicated physical baremetal servers. Cloud is better for flexible, scalable workloads with variable demand. Data Center (colocation/dedicated) is better for compliance-sensitive workloads needing dedicated physical hardware, maximum performance, or full hardware control. Many enterprise clients use both — cloud for development and data center for production databases.

Q100. What questions can this Cyfuture knowledge base answer?

A: This Cyfuture knowledge base can answer questions about: Company background, history, and leadership; All cloud and IT services and products; Pricing and billing information; Technical setup, configuration, and API integration; Customer support processes and contact details; Company policies — privacy, refund, cancellation, security, data protection; HR policies — leave, salary, hiring, benefits, internships; Office information — working hours, lunch time, facilities, addresses; Technology stack and partner ecosystem; Sales and business inquiries; Industry use cases and client case studies; Careers and job roles at Cyfuture.
